

QWIK-PURE® CS

intelligent, flexible, and affordable condensate separation

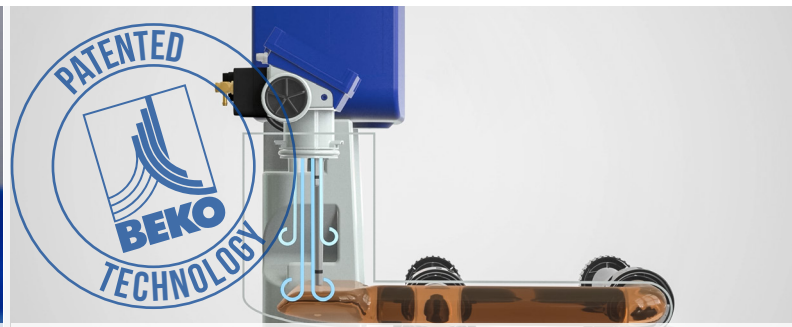

QWIK-PURE® CS Oil-water Separators

Intelligent Operation

Flow-regulated control of the unit at all times using capacitive sensor technology, complete visibility of the operational status, and data recording with an IIoT-ready controller.

Patented Functionality

The revolutionary principle of using very low pressure compressed air to push condensate through the cartridge in concert with the controls is exclusive technology.

Environmentally Safe

QWIK-PURE cartridges are hermetically sealed and are safe for sanitary landfills because the oil is securely trapped in the adsorption material, and sealed.

Quick and Easy Service

Patented quick disconnect cartridges combined with a lightweight filling material make installation and service simple, flexible, and clean.

Modular Expansion

A future-proof solution for any application that effortlessly expands and can accommodate up to 3,300 scfm in a compact space.

How it Works

The condensate enters through the inlet from the rotatable multiple inlet connection [1] into the unit.

The condensate and air mixture is depressurized in the depressurization chamber [2].

The FRC control unit [3] monitors the status as the condensate flows into the manifold [4] and distribution piping using gravity, then into the cartridges [5], where treated condensate flows through the baseplate [6] and up the discharge tube [7] to the outlet.

When the capacitive sensor of the FRC [8] measures a level-high setpoint in the reservoir, the FRC will close the piston valve [9] to isolate the entire system from the ambient surroundings.

Assisted by the FRC, using very low-pressure compressed air of < 5 psig, condensate is pushed through the filters to the outlet until the level low setpoint is reached.

Condensate is held in the collection reservoir beneath the FRC control unit [10] until discharged.

QWIK-PURE® CS Oil-water Separators

Disposing of air compressor lubricant carryover in condensate is a concern, as is the variety of regulations nationwide. Installation of an oil-water separator is simple. The oily condensate from each drain valve is individually piped to a depressurization chamber to reduce pressure to atmospheric pressure. The clean water is then piped into a waste water drain. The separated oil is contained within the cartridge for proper disposal.

Product Family

QWIK-PURE® CS 100

QWIK-PURE® CS 400

QWIK-PURE® iCS 2200

QWIK-PURE® CS High-Efficiency Oil-Water Separators with direct to cartridge filtration

- › Improved filling material that increases performance
- › Works well with all lubricant types
- › Lightweight easy to change cartridge
- › Min. / max. ambient temperature: 41 °F / 122 °F
- › Max. condensate temperature: 122 °F
- › Max. operating pressure: 232 psig

QWIK-PURE® CS	100	200	400
Total Installed System Flow Rate (scfm)	100	200	400
Compatible Lubricants	All lubricant types		
Condensate Inlet	2 x ½"	2 x ½"	3 x ½" 1 x 1"
Number of Cartridges	1	1	1
Voltage (VAC)	-	-	-
Dimensions and Weight			
H x W x D (inches)	21 x 8	23 x 15	58 x 25 x 21
Weight (lbs)	7.7	12.7	29.8

CLIMATE ZONE	YEARLY AVERAGE	CORRECTION FACTOR
Cool / Mild ■	66% RH 45°F	1.00
Medium / Arid ■	68% RH 55°F	.90
Hot / Tropical ■	72% RH 75°F	.80

FILTER CARTRIDGE LIFE CYCLE*	
1 Shift Operation	9-12 months
2 Shift Operation	7-10 months
3 Shift Operation	5-8 months

*Ranges are approximate

To use the sizing chart, locate the region for your application on the climate zone map above, multiply the Total Installed System Flow Rate value from the table by the climate zone correction factor shown (e.g., QWIK-PURE® iCS 550 is rated for 550 scfm in the green zone, but in the blue zone, the result would be 550 x 0.90 = 495 scfm), then match the result to the total flow rate of all installed compressors in the application. All QWIK-PURE® models work with all lubricant types, so you will instantly know your application's correct QWIK-PURE® model size.

Capacity tests and our long-term experience have enabled us to make locational adjustments to our capacity figures by taking global climate data into account. Regions in the southern United States (i.e San Antonio, TX) are subject to higher temperature and humidity levels throughout the year, which can yield different condensate treatment requirements. Therefore, if you feel that your regional location may have a significant impact on the application or installation, please consult your BEKO Technologies representative for details.

How it Works

1. Select the product or products that you wish to cover with the extended warranty.
2. Simply add 8% to the net price of each product or call your sales representative if you need help calculating your final net price.
3. Include this information as a line item with your purchase order or purchase the warranty extension up to 18-months post-sale.

What we need from you: It's not much. In fact, if you are purchasing the Cover3More extended warranty with a new equipment purchase, all you have to do is include a line item on your order indicating which items you wish you cover, and we will take care of the rest. If you happen to be adding coverage to a product you've already taken delivery of, then all we need is the company name and contact information of the original purchaser, the product model number of the product to be covered, serial number, and original purchase order number or BEKO Technologies invoice number, and we will apply coverage appropriately. **Please feel free to contact us at +1 (800) 235-6797 to get started.**

All maintenance procedures, including filter element changes, must be carried out in accordance with the manual in order to maintain any warranty.

■ Compare

We give you more: In addition to a robust, standard 2-year warranty on BEKO Technologies products, we offer our customers the option of extending the standard warranty even further with the **Cover3More** program – a low cost, all-encompassing, and simple warranty extension program.

- › Extends the standard factory warranty for an additional 3-years
- › May be purchased at any time up to 18-months post-sale
- › No hassle and easy to calculate without any hidden costs

Secure your future with a minimal investment. The **Cover3More** extended warranty program from BEKO Technologies ensures that your investment is covered for a total of 5-years at a nominal cost.

- › 2-year standard warranty covers parts and labor
- › 3-year extended warranty covers parts only, no parts restrictions
- › Significantly reduces your risk of having unexpected costs

Reliability you can count on: With the Cover3More extended warranty program, BEKO Technologies not only lengthens the standard warranty period by 3-years from the installation date, but also draws on the company's vast compressed air industry experience to quickly resolve any product problems you may experience in the least disruptive way possible, thereby keeping downtime to an absolute minimum. Should a repair be required, it will be handled by qualified, authorized personnel, and only original parts will be used.

What's in the fine print: The optional 36-month warranty extension (i.e. Cover3More) is a limited extended warranty that covers parts only from months 25-60.

However, all of the aforementioned installation, performance, and quality requirements must still be met in order to maintain extended warranty coverage. Failure to do so will render all warranties null and void.

The limited extended warranty coverage may be purchased and applied to any of the BEKO Technologies product lines included in the scope of the Cover3More extended warranty program from the original date of purchase from BEKO Technologies to 18-months thereafter.

Extended warranty coverage may not be purchased during the final 6-months of the standard warranty coverage, which are months 19-24 from the date of shipment or at BEKO Technologies' discretion, the date of installation.

The purchase price of the Cover3More limited extended warranty is not prorated and the current published purchase price is always applied.

Should the extended warranty coverage be purchased post-delivery or post-sale, then the serial number of all products to which the warranty shall be extended must be provided to BEKO Technologies at the time of purchase of the extended warranty.
