BOSS[®]
engineered **AIR** systems

FEATURES

Air hammers, rock drills and tampers can be the heaviest items at the jobsite. Loading and unloading them onto the vehicle is strenuous and often leads to injuries. The All new **BOSS® Titan EZ-Lift** eliminates those concerns by doing the work for you.

The *Titan EZ-Lift* stows your tools safely in a standard utility body 50" cabinet between jobsites.

The *Titan EZ-Lift* will hold up to three air tools and will raise and lower them from the vehicle to the ground as needed. The unit is a fully self-contained, all electric drive system with built-in safety features to prevent accidental or rapid movement while using 60% less amperage than the hydraulic equivalent.

Compact design requires minimum space and can be mounted on the deck or in a cabinet. Customized tool plates are available to meet your application requirements.

- Boss electric linear actuator self-contained on mechanical lift assembly designed for lifting 300 Lbs. Capable of a 34.0-inch lift/drop from the mounting surface.
- One-year warranty on electric linear actuator and mechanical lift assembly.
- Linear actuator to include 12 VDC operation, ball detent overload clutch, IP65 protection rating, integral load holding brake, and built-in 30A circuit breaker.
- Operating parameters: Equal time on/off, 4 minutes maximum.
- Mechanical lift: 19.5 inches wide, 15.5 inches deep, and 47.00 inches tall, capable of holding three tools within the perimeter of the mechanical lift assembly.
- Three steel shanks for tool placement (state size required when placing order.)
- Integral load holding brake will hold the lift and tools at any point in the lift movement.
- Electrical components to include: Raise/lower pendant for simplistic control.
- Safety devices to include: ball detent overload clutch, thermal overload incorporated into the motor, safety chains for individual tools, and necessary warning and information decals.
- Operation, parts, and maintenance manual.
- Installed and tested by a factory authorized and trained distributor.

SPECIFICATIONS

Dimensions:

- 47" H x 19.5" W x 15.5" D

Capacity:

- 3 Tool mounting with 300lb lift capability

Travel:

- 34" Lift/Drop from mounting surface

Weight:

- 190lbs
